

Miguel del Olmo M.

Audit Partner
Kreston IDCM
Mexico

I use IDEA.

"IDEA and the Smart Analyzer module truly meet the needs of Kreston IDCM as an international auditing firm. Essentially, its strengths are:

1. It can import data for analysis from any system or PDF report through a very simple configuration process, without having to rely on systems departments or encountering bottlenecks.
2. The process of analyzing information is extremely simple. At the click of a button you can perform all manner of tasks from identifying the behavior of a population to using statistical sampling tools.
3. It quickly documents and records our audit tests to assist us with our working papers.
4. Using supplementary tools such as Smart Analyzer, we can deploy a set of predetermined tests, which would otherwise take us days to prepare.

Training and support processes are also first rate. On the whole, it is a fantastic system, which allows auditing to keep costs down when it comes to running tests on our clients' systems, whatever they may be. I don't think any auditing firm—large or small—should be without IDEA."

Kreston IDCM is a leading provider of Audit, Tax, Transfer Pricing, Legal, External Trade, Business Management and Information Technology advisory services. They are members of **Kreston International Ltd.**, one of the largest global networks of accountants and independent business consultants, allowing them to efficiently serve clients anywhere in the world.

IDEA can read, display, analyze, manipulate, sample or extract from data files from almost any source. Lower your audit cost, add more quality to your work and meet professional standards.

Be a better auditor.
You have the knowledge.
We have the tools.
