

I use IDEA.

Inclusivite

“IDEA activates untapped potential in every industry in which it’s used to plan, prioritize, and perform internal audits. The software has added to the overall efficiency and effectiveness of our operation. We used IDEA to automate data feeds on a quarterly basis, review and customize exceptions, increase external audit reliance on our work, prioritize high-risk areas, and address internal control gaps. As a result, we were able to minimize risk and reduce external audit fees, generating a 1000% return on investment. We plan to share with our clients how IDEA can increase the value of their assets while minimizing risk, and see IDEA at the forefront of technology as internal audit continues to evolve.”
